Anti Patterns

Prerequisites

This seminar was developed for software developers with extensive experience in software development.

Duration

This seminar includes 4 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training.

The Topics

Antipatterns are common ineffective solutions to common problems. This seminar starts with answering to the question what an antipattern is, and continues with going over common anti-patterns in software development, and by going over common types of anti-patterns. This seminar includes the following topics:

What is Anti Pattern?
Spaghetti Code Anti Patterns
Golden Hammer Anti Patterns
Boat Anchor Anti Patterns
Dead Code Anti Patterns
God Object / Class / Library
