

Prerequisites

This seminar was developed for software developers with extensive experience in web applications development using Java Servlets, and JSP.

Duration

This seminar includes 4 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training, consulting and development. Haim has more than 25 years of experience in Java programming.

The Topics

This seminar introduces the MVC architecture and its implementation when developing the server side of web applications. During this seminar and as part of the explanations, the trainer will develop a web application that implements the MVC architecture.
