

UML Activity Diagrams

Prerequisites

This seminar was developed for project managers who want to start using UML activity diagrams in their work. Prior knowledge in programming is not required.

Duration

This seminar includes 4 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training. Haim Michael is a certified UML Professional. You can find his UML certification at <https://bit.ly/3hDjBrf>.

The Topics

This seminar starts with a small overview of the Unified Modelling Language, continues with a detailed overview of the available notations when creating a UML Activity diagram, and concludes with practical examples.
