REStful Web Services

Prerequisites

This seminar was developed for managers who want to better understand what a REStful Web Service is in order to improve the related business decisions they make. Prior programming knowledge is not required.

Duration

This seminar includes two academic hours. We can adjust this seminar to include code samples (assuming the participants have prior knowledge of programming).

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced, well-known software development trainer with more than 25 years of experience in software development training.

The Topics

This seminar starts with an overview of how the web works and basic explanations of the HTTP protocol. Once the basics are covered, we continue with explaining the XML and the JSON formats and explaining how a REStful web service works. This seminar concludes with practical examples of business models that are based on the use of REStful web services.
