

A dark banner image showing a person's profile in a dimly lit room with computer monitors in the background. The text "Introduction to ML" is overlaid in white.

Introduction to ML

Prerequisites

This seminar was developed for software developers who already have some experience with the Python programming language.

Duration

This seminar includes four academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by [Haim Michael](#), an experienced, well-known software development trainer with more than 25 years of experience in software development training and more than 15 years of experience in Python.

The Topics

This seminar covers the very basic topics in Machine Learning using the Python programming language. Taking this seminar you will acquire the knowledge required to continue studying this topic by yourself. This seminar covers the following topics:

- Introduction
- Terminology
- Regression Problems
- Linear Regression
