# MongoDB Design Patterns

## **Prerequisites**

This seminar was developed for software developers that already use the MongoDB database.

## **Duration**

This seminar includes 4 academic hours.

## **Premium Training**

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

## **The Lecturer**

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training, and more than 15 years of experience in Python.

## **The Topics**

MongoDB is a NoSQL document-oriented database. Taking this seminar, you will become familiar with some of the most relevant design patterns for using it. This seminar includes the following topics:

Introduction to Design Patterns

The Attribute Design Pattern

The Bucket Design Pattern

The Computed Design Pattern

The Document Versioning Design Pattern

\* More design patterns can be added
