Django Basics

Prerequisites

This seminar was developed for software developers with extensive experience in OOP using the Python programming language.

Duration

This seminar includes 8 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training.

The Topics

This seminar starts with a short overview of fundamental topics, such as what is the web, the HTTP protocol, HTML, JavaScript, and CSS. This seminar continues with a short introduction to the Django framework. Shortly after, this seminar continues with explaining the roles of the Request and the Response objects, and overviewing the Model and the View layers.
