

PySpark Fundamentals

Prerequisites

This seminar was developed for software developers with extensive experience in Python that want to start using the Apache Spark engine.

Duration

This seminar includes 4 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training, and more than 15 years of experience in Python.

The Topics

PySpark is an interface (in Python) for the Apache Spark open source project. This seminar includes the following topics:

- Introduction to PySpark
- Installing PySpark
- PySpark DataFrame API
- PySpark Pandas API
- PySpark SQL API
- PySpark Shell
