

Prerequisites

This seminar was developed for Java developers that already have some experience with coding in Kotlin. The resemblance that exists between Kotlin and Scala allows us to offer a fast track training to Scala for every Kotlin developer.

Duration

This seminar includes eight academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training, and more than 15 years of experience in Scala. Haim was one of the first lecturers worldwide that started to teach Scala in academic courses as part of academic courses He delivered in [HIT](#) and in [Shenkar](#) ([more info](#)).

The Topics

This seminar covers the core concepts and the core topics of the Scala programming language. This seminar includes the following topics:

- Introduction
- Classes
- Traits
- Inheritance
- Abstract
- Functions
- Properties
- Collections
- Exceptions
- Pattern Matching
