

Prerequisites

This seminar was developed for software developers, that already have experience in TypeScript.

Duration

This seminar includes 4 academic hours.

Premium Training

This seminar can be delivered either in Hebrew or in English. It can be delivered either online, or in a Hybrid way that allows the participants to choose whether to attend the meeting room where the training takes place or to join online.

The Lecturer

This seminar is delivered by Haim Michael, an experienced well-known software development trainer with more than 25 years of experience in software development training.

The Topics

This seminar was developed based on some of the best OOP practices and based on the unique characteristics of TypeScript, such as the support for structural typing. This seminar includes the following topics:

- Introduction to Interfaces
- The Basic Usage of Interface
- The Interface as a Common Base
- Multiple Inheritance using Interfaces
- The Use of Interfaces in Libraries Development
- Structure Definition using Interfaces
- Optional Properties using Interfaces
- Describing Functions using Interfaces
- Describing Array Types using Interfaces
- Interfaces Inheritance
