Having Fun with Recursion

Introduction

This activity includes multiple coding challenges that focus on recursion. The participants are required to be equipped with laptops. This activity can be delivered either online, in-person or in a hybrid way (allowing participants to take part online). The online scoreboard shows the score each participant has. By the end of this activity, we announce the winners. It is highly recommended to get ready with prizes for the winners.

Prerequisites

This social activity was developed for experienced software developers who are already familiar with recursion.

Duration

The entire activity is planned for 90 minutes (at the minimum). We expect to have up to three different coding challenges.

The Lecturer

This activity is delivered by Haim Michael, an experienced, well-known software development trainer with more than 25 years of experience in software development training.
